Introduction to Scrum

Scrum is an Agile framework used for managing and completing complex projects. It helps teams work collaboratively, deliver value quickly, and continuously improve.

Scrum Framework

Scrum is based on:

- Transparency
- Inspection
- Adaptation

It follows iterative development through short cycles called **Sprints**.

Scrum Team

A Scrum Team usually consists of:

1. Product Owner

Responsible for:

- Managing the Product Backlog
- Defining product goals
- Prioritizing tasks
- Maximizing product value

2. Scrum Master

Responsible for:

- Guiding the team in Scrum practices
- Removing obstacles
- Ensuring smooth Scrum processes
- Helping the team improve

3. Developers

Responsible for:

- Building the product
 - Delivering increments
 - Collaborating during the Sprint
-

Scrum Events

1. Sprint

- Time-boxed iteration
- Usually 1–4 weeks
- Produces a usable product increment

2. Sprint Planning

Purpose:

- Decide what work will be done
- Create Sprint Goal
- Plan tasks for the Sprint

3. Daily Scrum

- 15-minute daily meeting
- Discuss progress and blockers

Common Questions: 1. What did I do yesterday? 2. What will I do today? 3. Any obstacles?

4. Sprint Review

- Demonstrate completed work
- Collect feedback from stakeholders

5. Sprint Retrospective

- Review team performance
 - Identify improvements for next Sprint
-

Scrum Artifacts

1. Product Backlog

A prioritized list of all project requirements.

2. Sprint Backlog

Tasks selected for the current Sprint.

3. Increment

The completed and usable product outcome after a Sprint.

Scrum Values

1. Commitment
 2. Focus
 3. Openness
 4. Respect
 5. Courage
-

Advantages of Scrum

- Faster delivery
 - Better teamwork
 - Improved product quality
 - Continuous feedback
 - Flexibility to changes
-

Difference Between Agile and Scrum

Agile	Scrum
A methodology/philosophy	A framework under Agile
Broad concept	Specific implementation
Flexible approaches	Fixed roles and events

Scrum Workflow

1. Product Backlog Creation
2. Sprint Planning
3. Sprint Execution
4. Daily Scrum Meetings
5. Sprint Review
6. Sprint Retrospective
7. Repeat Next Sprint

Conclusion

Scrum is a simple yet powerful framework that improves collaboration, productivity, and product delivery through iterative development and continuous improvement.
